

## CS530 Operating System

The following problems are from the CoMon paper.

1. Give two different problem formulations about the paper, i.e., what is the problem tackled in the paper? Please state in two different versions.

2. What are the solution approaches for each of the above cases?

3. What are the weak points of the paper as it is? Why?

4. Criticize the performance study of the paper.

4.1. Strong points

4.2. Weak points.

4.3. Add or modify the experiment design, and describe why.
